

CHAMITH KAVISHAN

Software Engineer

chamithkavishan01@gmail.com | +94 77 873 9820 | LinkedIn | GitHub

Profile

Versatile Full-Stack Software Engineer with extensive experience in web and mobile application development and a strong foundation in Computing Science. Proficient in JavaScript with modern frameworks—including React.js, Next.js and backend development with Node.js. Adept at API design, real-time data processing to tailor innovative, scalable solutions. Committed to leveraging modern technologies to solve real-world challenges and drive continuous improvement.

Technical Skills

Programming Languages and Frameworks and Tools:

JavaScript | Typescript | PHP | C# | Java | HTML | CSS | Tailwind CSS | Bootstrap | React.js | Next.js | Redux
| Node.js | REST API Development | Express.js | Nestjs | React Native (Expo) | NativeWind | MySQL | SQL
Server | Git | SMS Gateways | Web Sockets

Skills:

- 3 Years of experience in React.js and Next.js frontend Development
- 3 Years of experience in Node.js Nest.js Development
- 3 Years of experience in E-Commerce Web Application Development
- 3 Years of experience in Xampp, Wamp Servers (Apache, PHP, MySQL)
- Good knowledge of Responsive Web Applications Development
- Experience in Payment and SMS gateways integration

Experience

Software engineer | DashIT Business Solutions | December 2025 – Present

Software engineer | Optimize solutions | January 2024 – December 2025

- Led a team of 7 interns in building and maintaining scalable web applications, driving performance improvements and cleaner code architecture.
- Engaged with 15+ clients to gather requirements and deliver tailored web solutions, leading to increased user engagement and retention.
- Migrated the tech stack from React.js/Express.js to Next.js/NestJS, significantly improving server response times and maintainability.

Associate Software engineer | Optimize solutions | January 2023 – December 2023

- Contributed to full-stack application development using React.js and Express.js ensuring modular,

maintainable code.

- Refactored legacy codebases and implemented development best practices with Prettier, Code Spell Checker, and ClickUp, reducing bugs and boosting team productivity.
- Supported senior engineers in building RESTful APIs and integrating real-time features for data-heavy modules.

Intern Software Engineer | Optimize Solutions | June 2022 – December 2022

- Assisted in front-end and back-end development using React.js and Node.js, contributing to the delivery of production-ready features.
- Worked closely with associates and seniors to optimize backend queries and improve server performance.
- Helped debug and troubleshoot issues by analyzing logs and applying targeted fixes, improving system reliability.

Education

Kingston University | January 2024 – January 2025

Bachelor of Science (Hons) in Computer Science (Software Engineering) – First Class Honors

ESOFT Uni | June 2021 – June 2023

Pearson HND in Computing – Merit

Projects

- **Perth Cars Pre-Purchase Inspection App – Mobile**

Application:

Technologies: React Native (Expo), NestJS, AI Integration

Role: Frontend Development

Description: Developed a mobile application that empowers potential car buyers to conduct preliminary vehicle health assessments before purchasing used cars. This self-service inspection tool provides instant insights based on vehicle specifications and common issues.

- **FlexPay – Buy Now, Pay Later Mobile App:**

Technologies: React Native, Redux, NestJS, Microservices

Role: Frontend Development

Description: Developed the frontend of a BNPL (Buy Now, Pay Later) mobile application using React Native and Redux. Integrated seamlessly with a NestJS-based microservices backend to deliver a smooth, responsive, and scalable user experience for managing deferred payments.

- **Supreme TV Presidential Election 2024 Website:**

<https://election.supremeradio.lk/>

Technologies: React.js, Node.js, MySQL

Role: Full Frontend Development

Description: Developed a dynamic website for the 2024 presidential election, delivering timely updates and an intuitive user interface to engage a broad audience.

- **Adibid Mobile Application:**

Technologies: React Native (Expo), Socket.io, Redux, Express.js, MySQL

Role: Frontend Development

Description: Created a mobile platform to engage stock market investors and advisors through real-time updates, interactive communication, and a responsive design.

- Premier Rubber Production Management System:**
 Technologies: React.js, Express.js, MySQL, Socket.io
 Role: Frontend and Backend Development
 Description: Built a production management system with real-time monitoring of stocks, suppliers, customers, and production workflows. Developed responsive dashboards and interfaces to streamline invoicing, reporting, and decision-making, improving overall operational efficiency.
- Election Incidents Analysis System (CMEV):**
 Technologies: React, Express, MySQL
 Role: Frontend Development
 Description: Built an interactive dashboard for real-time election monitoring and data visualization, which streamlined reporting and supported informed decision-making.
- Wholesale Products Selling Website:**
<https://grocerysdirect.com/>
 Technologies: React.js, Node.js, MySQL
 Role: Frontend Development
 Description: Developed an efficient e-commerce site that enhanced product display, user experience, and checkout processes for a Canadian client.
- OS Invoice:**
 Technologies: React.js, Express.js, MySQL
 Role: Frontend & Backend Maintenance
 Description: Implemented a comprehensive invoicing system featuring modules for inventory management, customer and supplier management, GRN, and invoicing operations.
- Unidil Inventory Management System:**
 Technologies: React, Node.js, MySQL
 Role: Frontend & Backend Maintenance
 Description: Developed a tailored system for Unidil to manage inventory and job processes, thereby streamlining their operational workflows.
- Unidil CMS System:**
 Technologies: React, Express.js, SMS Gateways, MySQL
 Role: Frontend & Backend Development
 Description: Automated the maintenance job card process and managed machine/vehicle maintenance schedules through a comprehensive content management system.
