DOB : 30/05/2001 | Sri Lankan | School : Sri Sumangala College, Panadura | Language : English | Sinhala

Qualifications

- **Programming Languages** : PHP | JavaScript | C# | HTML | CSS | tailwindcss | MYSQL | SQL SERVER | AJAX | jQuery | JAVA | Python | Laravel | React JS | Mern Stack | NextJs | Rest API | Payhere | SMS gateways | LINUX | NestJs
- **Skills** :
 - 3.5 years' Experience in NodeJs/Nest Js development
 - 3.5 years' Experience in ReactJs frontend development
 - 4 Years' Experience in E-Commerce Web Application Development
 - 3.5 Years' Experience in Xampp, Wamp Servers (Apache, PHP, MySQL)
 - 2.5 Years Experience in PHP OOP and MVC web applications
 - Good Knowledge of Responsive web applications
 - Experience in Credit Card, PayPal Payment Gateways
 - Experience in Fintech Domain

Programming Frameworks

- Laravel, Cake – PHP
- ReactJS, NodeJs, React Native– JavaScript

Tools and Technologies

Adobe Photoshop | Adobe Illustrator | NetBeans | PHP Storm | Microsoft Visual Studio | VS Code | Cpanel

Version Controls : GitHub | Bitbucket

Professional Experience

Web Developer Dec-2020 – April 2022 Intellect Choice, Horana

Trainee Software Engineer May-2022 – Dec 2022 Optimizesolutions, Colombo

Software Engineer Jan-2023 – Aug 2024 Optimizesolutions, Colombo

Software Engineer Sep-2024 – March 2025 Infinitixx, Melbourne

Software Engineer March 2025 - Current Ideahub, Colombo

Education

- BSc (Hons) Computing Science in Software Engineering (Kingston University) •

Pearson HND in Computing (ESOFT Metro Campus) – (2021-2023)

- Pearson Diploma In Information Technology – (2021)
- Pearson Diploma In English – (2021)
- Passed GCE A/L 2020 in Physical Science : 2B, 1C | GCE O/L 2017 : 8A, 1C

Working Examples

❖ DFCC One Online Banking Portal

A comprehensive fintech web application developed for one of the leading banks in the country. I was responsible for implementing the Bill Payment section, Fixed Deposit (FD) opening, and Favourite Payments functionality. The tech stack included React for the frontend and NestJS for the backend, running on Ubuntu OS. Through this project, I also gained hands-on experience in configuring Nginx for deployment and server management.

❖ OS Invoice

Web application to handle invoices in micro-level business. **Nodejs** is used for backend development. I have created APIs for email services and dynamic invoice management, multi user authentication, and profit loss report generation. And also, I was able to get hands-on experience in cPanel in this project.

❖ Adibid App

This is a mobile application to connect trade advisers and investors. **React Native** is used for front-end development. **NodeJs** is used for the backend development. I have contributed to this application by creating APIs. In this project, I learned about push notifications. Live chat integration by using Socket.io, creating certain jobs using Redis. Getting data from Excel sheets and manipulating them.

❖ Service Center Management

Involved in implementing the **NodeJS/ Laravel backend**. I have created APIs using Nodejs to maintain day-to-day processes. And also generate reports using data from both the old backend and the newly implemented system.

❖ Unidil Inventory Management System

This is a web application to maintain inventory management and handle the distribution process. **Node/ExpressJS** is used for the backend. I created APIs to manage inventory data, including adding, updating, and retrieving records. The APIs also handle the distribution workflows, ensuring seamless integration with the front end.

❖ Trade Data insights

<https://tradedatainsight.com>. This is a website that provides analytical data about the stock market. **Node/ExpressJS** is used for the backend. I created APIs for user validation, and data distribution among other stakeholders. Create a market analysis for the given time. Send email

through the backend.

❖ **Trusted Immigration Lawyers**

Node/ExpressJS is used for the backend. This is a UK client project for a visa agency. **ReactJs** is used for front-end development. I created APIs to manage inquiries. User management, employee management.

❖ **Trusted Immigration Lawyers**

Node/ExpressJS is used for the backend. This is a Sri Lankan Client project for a traveling agency. **ReactJs** is used for front-end development. I created APIs to manage inquiries

❖ **Silvermill CDP Program**

Node/ExpressJS is used for the backend. **ReactJS/Typescript** is used for the front end. I create both APIs and the frontend functionalities in this project. I was lucky to get to know about **Payhere** payment Integration, and **SMS gateways** from this project

❖ **Event Management site**

This is a **PHP Laravel** Project. It contains three portals administrator, vendor, and client app. This system can manage Venues, Locations, blog posts, Comments, Pages, Sponsors, Speakers, Event Schedules, QR QR-based tickets, payments, shopping carts, and Event builders for users.

❖ **Multi-Vendor shopping system**

This is a **PHP Laravel** project. I had worked with Vendor portal repeat orders feature, Vendor store site creation including mini-cart, cart page, and checkout process, and payment gateway instigation.

❖ **Booking site**

This is a **PHP Laravel** project. This Canadian client project manages customer shipping bookings by container types, scheduling, driver management, route and tracking management, payments, and client portal.

❖ **Blog site**

This local blog is publishing news about show business in Sri Lanka. **Bootstrap frontend, Laravel Backend**

❖ **News Site**

This local news site publishes daily and weekly local news. **Bootstrap frontend, Laravel Backend**
